Title : Prefabricated buildings - Definitions and minimum performance range
Scope : This Standard specifies definitions and the minimum performance range of prefabricated buildings, irrespective of the construction materials used, namely for residential buildings, office buildings, kindergartens, schools and general purpose buildings. This ÖNORM does not cover buildings erected with prefabricated, but not floor-high individual supporting elements, such as houses made of brick, aerated concrete masonry units, hollow bricks and jacket blocks or timber planks for blockhouses. The same applies to buildings which do not fulfil the minimum performance requirements of Clause 4.

Title :	Halal food - Requirements for the food chain
Scope :	Halal ("pure, permissible") covers all things and doings, which are permissible according to the islamic law. The opposite is haram ("forbidden"). Between halal and haram is a grey area called makruh. Makruh ("hated") covers all things which are not explicitly forbidden but are moving towards haram. Muslims are encouraged to avoid this grey area. This classification includes the whole area of life of an muslim. For the purpose of food one has to distinguish clearly between halal and haram. This ON-Rule specifies requirements on the food chain - excluding cereal products and dairy products - to ensure, that food is permissible (halal) according to the islamic law.
