Title : Rubber and plastics hoses and hose assemblies for use with LPG and natural gas in the vapour phase up to 2,0 MPa – Requirements for rubber and plastics tubing and hose

Scope : This standard is a complement to SS-EN 1762 . The standard will replace SS-EN 1763-1 since SS-EN 1763-1 was withdrawn 2002 based on decision in CEN to withdraw the EN-standard and start a development of a new version. Last year CEN/TC 218 decided to stop the development of an EN-standard and it was therefore decided in to initiate a work with a national standard to cover the market needs. The standard will be based on the latest version of prEN 1763-1, but will be limited in its contents to one rubber hose and one plastic pipe. Since the market for this type of products is global, it is the intention to present this standard when it has been published as Swedish standard, to ISO/TC 45/SC 1 as a proposal for a new work item.
