Title : Sustainable development in municipalities, counties and regions (local authorities)
Scope : The aim of this project is to develop a Swedish national guidance standard* for Sustainable development, that is in line with the specific needs of Swedish local authorities (including municipalities, counties and regions). The content and the structure of the standard will cover the extensive scope of activities associated to this target group. The standard will also take into account the complex form of government that is typical for Swedish local authorities where “top management” is a combination of employees and politicians. The scope of issues addressed in the standard will be closely related to the scope of the coming ISO 26000 on Social responsibility.

Title : Fixed firefighting systems - Components for gas extinguishing systems - Requirements and test methods for the compatibility of components

Scope : The standard specifies requirements and describes test methods for design systems for assembled gas extinguishing systems. For the correct function of an assembled gas extinguishing system it is important, that: components are suitable for their use in fire extinguishing installations using the specific gas; components are technically compatible; components are functionally compatible.
