 Title : Eurocode 3 - Design of steel structures - Part 2: Steel Bridges
 Scope : 1.1.1 Scope of Eurocode 3
 (1) See 1.1.1(1), (2), (3), (4), (5) and (6) of EN 1993-1-1.
 1.1.2 Scope of Part 2 of Eurocode 3
 (1) EN 1993-2 provides a general basis for the structural design of steel bridges and steel parts of composite bridges. It gives provisions that supplement, modify or supersede the equivalent provisions given in the various parts of EN 1993-1.

Scope :

(2) The design criteria for composite bridges are covered in EN 1994-2.
 (3) The design of high strength cables and related parts are included in EN 1993-1-11.
 (4) This European Standard is concerned only with the resistance, serviceability and durability of bridge structures. Other aspects of design are not considered.
 (5) For the execution of steel bridge structures, EN 1090 should be taken into account.
 NOTE: As long as EN 1090 is not yet available a provisional guidance is given in Annex C.
 (6) Execution is covered to the extent that is necessary to indicate the quality of the construction materials and products that should be used and the standard of workmanship needed to comply with the assumptions of the design rules.
 (7) Special requirements of seismic design are not covered. Reference should be made to the requirements given in EN 1998, which complements and modifies the rules of EN 1993-2 specifically for this purpose.

Title : Sewage treatment plants - Small sewage treatment plants for 51 to 500 population equivalents - Application, dimensions, construction and operation

Scope : This ÖNORM has to be applied for dimensioning, construction, operation, maintenance and the checking of the purification efficiency of sewage treatment plants with a design size ranging from 51 till 500 population equivalents (PE) ("small sewage treatment plants") hereafter also called "plants" which are fed with domestic and/or equivalent sewage. As far as plants situated in areas of high altitude are concerned the applicability of the present ÖNORM has to be proved separately. In such cases the ÖWAV-Regelblatt 1 "Abwasserentsorgung im Gebirge" may be also used. Constructed wetlands are not subject of this standard but are dealt with by ÖNORM B 2505. Small sewage treatment plants (up to 50 PE) which are constructed on site are not subject of this standard. Prefabricated and/or on site assembled small sewage treatment plants for up to 50 PE are also not subject of this standard, those plants are dealt with by ÖNORM EN 12566-3. For plant types and constructions which are not dealt with by the present standard as well as for plant expansions and for combinations of plant units individual assessments shall be carried out. Also processes geared for the denitrification of sewage are not subject of this standard, those shall be assessed individually, especially if soil infiltration is applied.
