**National Ref :** U70001411  
**Title :** Smoke and heat control systems - Part 1: Design, installation and maintenance for natural smoke and heat exhaust ventilators  
**Scope :** This standard gives the criteria for calculation and design, installation, commissioning, use, routing checking and maintenance for Natural Smoke and Heat Exhaust Ventilation Systems (NSHEVS) in case of fire. This standard applies to: single-floor construction, last floor of a multi-floor construction, intermediate floor of a multi-floor construction connectable with the roof. This standard applies to NSHEVS made with roof mounted Natural Smoke and Heat Exhaust Ventilators (NSHEV) and gives indications and criteria to take into account for the design and installation of NSHEVS made with wall mounted NSHEV.

**Scope :** This technical specification specifies data and procedures for the calculation of the energy performance of buildings relating to space heating and cooling and domestic hot water production. This technical specification is a national guideline for immediate and univocal application of technical specifications elaborated by CEN to support the Directive 2002/91/EC "Energy Performance of Buildings". This technical specification is divided into 4 parts: Part 1 - Energy need for space heating and cooling, Part 2 - Primary energy and system efficiencies for space heating and domestic hot water production, Part 3 - Primary energy and system efficiencies for space cooling, Part 4 - Renewable energy and other generation systems for space heating and domestic hot water production. This part 4 deals

**Scope :** with the following generation systems: (1) solar systems, (2) biomass combustion systems, (3) heat pumps, (4) photovoltaic systems, (5) cogeneration systems, (6) district heating systems.

**Title :** Halal food - Requirements for the food chain  
**Scope :** In Islam, "halal" (pure, permitted) refers to all objects and actions allowed or permissible under Islamic law. Its opposite is "haram" (forbidden). There is a grey area between halal and haram that is referred to as "makruh". Everything that is not explicitly forbidden, but tends towards haram is makruh ("offensive" or "disliked"). Muslims should also avoid this grey area as a precaution. This classification pervades the entire sphere of life of a Muslim. In the field of nutrition, however, a distinction is essentially made between halal and haram. This ON Rule defines requirements for the food chain in order to ensure that foodstuffs are considered to be allowed or permitted ("halal") under Islamic law.

**Scope :** reliability for the processes that are necessary to provide all the services needed by its citizens in a consistent and reliable manner. All the local government's processes, including management, core, operational and support processes, should constitute a single, integral, quality management system. The integral character of this system is important because, otherwise, although a local government could be reliable in some areas of activity, it may be unreliable in others. For a government to be considered reliable, it should guarantee minimum conditions of reliability for all key processes and services.
