National Ref : ÖNORM F 3008
Title : Oxygen reduction systems - Control panels
Scope : This ÖNORM specifies requirements and tests for automatical and electrical control panels for oxygen reduction systems, which are installed in buildings. It defines obligatory functions, which have to be foreseen for all of this control panels and options with requirements which can be incorporated. Further features which are intended in connection with oxygen reduction can be foreseen but they are not covered in this ÖNORM.

Title : Geometrical product specifications (GPS) - Dimensioning and tolerancing - Cones
Scope : This International Standard establishes the definition of cones and specifies the graphical symbol to be used for their indication and methods for their dimensioning and tolerancing. For the purposes of this International Standard, the term "cone" relates to right-angle circular cones only. For simplicity, only truncated cones have been represented in this International Standard. However, this International Standard can be applied to any type of cone within its scope. This International Standard is not intended to prevent the use of other methods of dimensioning and tolerancing.
