**Title :** Building - Metallic products for discontinuous roofing - Descriptive classification

**Scope :** The standard defines the general criteria for the classification of the metallic products having the main purpose of leaktightness element for the discontinuous roofing. Is intended to be applied to all metallic products delivered as tiles, sheets and composite panels which shall be used for the leaktightness element production in discontinuous roofing and shall be employed on documents regarding technical information, packaging, labelling and generally in the products coding.

**Title :** Air purity protection -- Determination of 1,4-dioxane in workplaces by gas chromatography

**Scope :** Presented method consists in the adsorption of 1,4-dioxane on activated charcoal, desorption of the compound with carbon disulphide and propan-2-ol solution and analysis of the obtained solution by gas chromatography. The lowest concentration of 1,4-dioxane which can be determined by this method is 5 mg/m<sup>3</sup>

**Relatedness :**
