Monthly Notifications Register

Notifications registered at CCMC from 2010-07-01 to 2010-07-31

Sector B : BUILDING AND CONSTRUCTION

Register issued on : 2010-08-02

Subsector B01: FIRE PROTECTION

Subsector : B01 **Registration Date :** 2010-07-13
Organization : DIN
Country : Germany
Project ID : 03100749/0001 **Project Established**
ICS :
National Ref : 03100749
Title : Bridges for fire hoses - Part 1: Bridges of rubber for fire hoses

Relatedness :

National : New

Subsector : B01 **Registration Date :** 2010-07-13
Organization : DIN
Country : Germany
Project ID : 03100750/0001 **Project Established**
ICS :
National Ref : 03100750
Title : Fire fighting equipment - Trough

Relatedness :

National : New

Subsector : B01 **Registration Date :** 2010-07-13
Organization : DIN
Country : Germany
Project ID : 03100751/0001 **Project Established**
ICS :
National Ref : 03100751
Title : Boxes for fire equipment - Boxes made of wood, light metal and light metal/wood

Relatedness :

National : New

Subsector : B01 **Registration Date :** 2010-07-08
Organization : NEN
Country : Netherlands
Project ID : 50001580/0001 **Project Established**
ICS : 13.220.20
National Ref : NPR 6095-1:2010 Concept nl
Title : Smoke and heat control systems - Part 1: Guidelines on design and installation of smoke and heat exhaust installations
Scope : In this code of practice design and assessment guidelines for installation technical facilities of smoke and heat exhaust ventilation systems, are given. The requirements for the assesment of smoke and heat exhaust ventilation installations are given in the Dutch standard NEN 6093:1995. This code of practice deals with mechanical as well as natural smoke and heat exhaust ventilation systems.

Subsector B02: STRUCTURES

Subsector : B02 **Registration Date :** 2010-07-13
Organization : ASI
Country : Austria
Project ID : 00023334/0001 **Project Established**
ICS : 91.010.30
National Ref : ÖNORM B 1990-1
Title : Eurocode - Basis of structural design - Part 1: Building construction - National specifications concerning ÖNORM EN 1990
Scope : This Austrian Standard specifies national parameters relating to ÖNORM EN 1990 Annex A1 "Application for buildings" and shall be applied jointly with ÖNORM EN 1990.

Relatedness :

National : New

Subsector : B02 **Registration Date :** 2010-07-13
Organization : ASI
Country : Austria
Project ID : 00023335/0001 **Project Established**
ICS : 91.010.30
National Ref : ÖNORM B 1991-1-5
Title : Eurocode 1 - Actions on structures - Part 1-5: General actions - Thermal actions - National specifications concerning ÖNORM EN 1991-1-5
Scope : This Austrian Standard specifies national parameters to ÖNORM EN 1991-1-5 and shall be applied jointly with ÖNORM EN 1991-1-5 in Austria. EN 1991-1-5 gives principles and rules for calculating thermal actions on buildings, bridges and other structures including their structural elements. Principles needed for cladding and other appendages of buildings are also provided. This Part describes the changes in the temperature of structural elements. Characteristic values of thermal actions are presented for use in the design of structures which are exposed to daily and seasonal climatic changes. Structures not so exposed may not need to be considered for thermal actions. Structures in which thermal actions are mainly a function of their use (e.g. cooling towers, silos, tanks, warm and cold storage facilities, hot and cold services etc) are treated as well.

Title : Fibre-cement profiled sheets incorporating PUR and polyester coating at the bottom, and fittings - Requirements and test methods
Scope : This document specifies the technical requirements and establishes the test methods for fibre-cement profiled sheets incorporating PUR and polyester coating at the bottom, and its fittings.
This document covers fibre-cement profiled sheets that incorporate in a second production process a PUR layer between the fibre-cement and a polyester coating placed at the

Scope : bottom. This is done by means of an individual injection system. The final product is a slab with better mechanical characteristics and more anti-corrosive resistance. For the purpose of this documentm fibre-cement profiled sheets are classified according to their height of corrugation and their mechanical characteristics. This document does not include calculations with regard to works, design requirements, installation techniques, wind uplift or rain proofing of the installed sheets.

Title : Classification of hazardous areas with respect to explosion hazard - Part 2: Dust explosion hazard, based on NEN-EN-IEC 61241-10-2:2009

Scope : This Dutch code of practice gives guidelines to formulate a classification of hazardous areas with respect to explosion hazard. This code of practice is a help for the practical application of NEN-EN-IEC 61241-10 and is to be used in relation to this standard. The application can be in the industrial sector as well as the mining sector.

Title : Road traffic and transport telematics - Automatic dynamic debiting systems and automatic access control systems using GNSS/CN - Localization augmentation communication for GNSS/CN systems over UNI 10607 DSRC
Scope : On-board units working with satellite positioning to collect data required for charging for the use of roads operate in an autonomous way, i.e. without relying on dedicated road-side infrastructure. However, some situations (e.g. when satellite signals are not perceived), require that positioning information be updated by road stations via dedicated short range communications. This standard defines the types of data and the DSRC exchanges when the communication medium is based on the UNI 10607:2007, Parts 1 to 4, standard.

Title : Wastes - Manual sampling and preparation of sample and analysis of eluates

Scope : The standard describes: - The process of defining a sampling plan - Manual sampling of liquid, granular, past-like, coarse, monolithic and sludge in relation to their different physical and short-term storage; - Procedures for reducing the size of the samples of the waste collected in the field, to facilitate transport in the laboratory; - Documentation for the traceability of sampling operations; - Procedures for packaging, preservation, sample short-term storage and transport of samples of waste; - Procedures for reducing the size of samples for laboratory analysis; - Procedures for preparation and analysis of eluates. It applies to all types of waste such as liquid waste, liquefied by heating, liquid sludge, past-like sludge, powders or granular waste, coarse waste and monolithic waste.

Title : Road equipment. Data quality. Data analysis. Part 1: Traffic data
Scope : This standard constitutes a system for the exchange of information between Traffic Control Centres of an area or region (Zonal Traffic Control Centre) and other systems or Institutions.
 The goal is to have a standard platform delivering the real-time publication of traffic, meteorological and signalling parameters, enabling several systems to exchange information and consult historical and statistical information.
 Hereinafter the information exchange system which is the subject of this standard will be

Scope : referred to as Sistema INTERCENTROS.
 The procedure for exchange is based on the use of centralised databases where the management systems will upload both real-time information (equipment states and alarms and the parameters provided by them, detailed road traffic information, etc.) and historical information (only data).
 As one example of use, based on the information exchange method described by this standard, the information updated in real time by the Zonal Traffic Control Centres could be displayed on the operation interfaces of the Traffic Management System at the Centre of Centres.
