 Title : Thermal insulation products for buildings. Installation control.
 Scope : It is well known that thermal insulation products have a significant impact on the consumption of energy in buildings.
 To achieve nearly zero-energy buildings it is necessary to provide the buildings with an optimal thermal insulation in the roofs, floors and façades.
 Therefore, the control of insulation during the building process is essential.
 This Technical specification provides information to control thermal insulation products during the project, construction works for new buildings and refurbishment.
 Checklists are included to verify thermal insulation products installed in buildings.

Title : Fibre-cement profiled sheets incorporating PUR and polyester coating at the bottom, and fittings - Requirements and test methods

Scope : This document specifies the technical requirements and establishes the test methods for fibre-cement profiled sheets incorporating PUR and polyester coating at the bottom, and its fittings.

This document covers fibre-cement profiled sheets that incorporate in a second production process a PUR layer between the fibre-cement and a polyester coating placed at the bottom. This is done by means of an individual injection system. The final product is a slab with better mechanical characteristics and more anti-corrosive resistance.

For the purpose of this document fibre-cement profiled sheets are classified according to their height of corrugation and their mechanical characteristics.

This document does not include calculations with regard to works, design requirements, installation techniques, wind uplift or rain proofing of the installed sheets.

National Ref : PNE 135363
Title : Vertical signs. Road delineators. Fixed cylindrical road delineators in plastic material. Characteristics and test methods.
Scope : This standard defines particular characteristics, dimensions and test methods for the cylindrical delineators made of plastic.

Relatedness :

National : REV/AMD UNE 135363:1998

Subsector : T19 Registration Date : 2010-10-29
Organization : AENOR

National Ref : PNE 199032-1
Title : Road marking equipment. Data capture stations. Functionality and protocols. Part 1: Functionality standard. Speed x Length traffic data matrix

Scope : The standard (functional Standard and protocols of data traffic stations) defines the provision of traffic data classified by length or speed. This rule is an extension of the same and defines the capacity of these teams to provide information classified by the two criteria simultaneously, composing a table of speeds x lengths
