#### Subsector A99: UNDETERMINED

Subsector: A99 Registration Date: 2011-08-12

Organization : ASI
Country : Austria

Project ID: 00024018/0001 Project Established

ICS: 03.180 National Ref: 0NR 42000

Title: Quality criteria for training firms

Scope: A training firm is a firm belonging to a system, to train skilled employees. It collaborates

with other training firms in a network and resigns from dealing with real money, i.e. the exchange of goods, services and money is virtual and without real risk. For allmost every sector there are training forms, e.g. IT-services and catering services. Trainging firms and their employees buy and sell goods and/or services on avirtual level. Usually a traing firms is divided into differt departments, e.g. marketing, financing and sale. In Austria training firms are used to prepare or to train the access to employmentship, occupational come-back and change among other things. They are operated by schools and by organisations for adult

vocational training.

Title: Quality criteria for entrepreneur schools

**Scope:** This ONR determines quality criteria for entrepreneurship education on schools. The aim of

this education is to give pupils an understanding for entrepreneurial thinking

(entrepreneurial spirit) and acting and by proving adequate preparation and education enabling the pupils either to become entrepreneurs or - in the spirit of entrepreneurship - to apply the acquired knowledge and skills in upper employments for their own benefits and for the benefit of society. This ONR contributes to motivation of people being part in the field of education to address entrepreneurship education and to start the discussion on

schools about issues of entrepreneurship education, to intensify and to maintain this

**Scope:** discussion.

National Ref:

Title: Testing methods for beer – Part 10: Determination of haze

**Scope:** The beer clarity is one of the basic quality characteristic which a consumer judges at first

sight. The beer clarity can also provide information about process of technology procedure. Its value is influenced by parameters of applied radiation and observational angle in the turbidity meter. It causes that results obtained from various construction type instruments can differ. Therefore, the norm defines acceptable parameters of turbidity meters and the

way of their calibration according to EBC recommendation.

Subsector: N14 Registration Date: 2011-08-12

Organization: ASI
Country: Austria

**Project ID:** 00024019/0001 Project Established

ICS: 23.040.20 National Ref: ONR 25194

Title: Determination of the resistance to slow crack growth of polyethylene with cracked round

bar (CRB) specimens

**Scope:** This ONR specifies a method for measuring the resistance against crack initiation and slow

crack growth (SCG). This relevant long-term failure mechanism in mechanical loaded pipes will be tested with cylindrical notched specimens subjected to a cyclic tensile load. The test results include the cycle number until failure as a function of the stress range. This method is suitable for an accelerated fracture-mechanics characterization at ambient temperatures of 23 °C of different polyethylene grades, especially for medium density (PE-MD) and high

density (PE-HD) types for pipe applications, but can also be adapted for other thermoplastics materials, temperatures and applications. It can be used to evaluate specimens from compression-moulded sheets or finished products (e.g.: pipes).

ICS: 93.080 National Ref: prLVS 190-3

Title: Road design specifications. Part 3: Road junctions at grade

Scope: This standard specifies rules for designing road junctions at grade

Relatedness:

National: REV/AMD LVS 190-3 (2009)

Subsector: T19 Registration Date: 2011-08-17

Organization :LVSDraft Issue Date :2011-09-29Country :LatviaLatest Date for Comments :2011-11-15Project ID :01500026/0001Project Established

ICS: 93.080 National Ref: prLVS 94

Title: Road restraint systems. Vehicle restraint systems. Safety barriers. Application

**Scope:** This standard specifies application rules for safety barriers

Relatedness:

National: REV/AMD LVS 94 (2006)
