Register issued on : 2011-10-07

## Subsector A01: TOURIST SERVICES

---

**Subsector :** A01 **Registration Date :** 2011-09-12  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024108/0001 **Project Established**  
**ICS :** 01.080.10, 45.100, 97.220.10  
**National Ref :** ÖNORM S 4610  
**Title :** Signs for use of ropeways, ski-lifts and other climbing aids - Requirements and design  
**Scope :** The present Austrian Standard specifies requirements for and the design of signs used for ropeways for transport of persons (funicular railways, cable railways with pendulum or circulation service, chair railways, chair lifts) and for ski-lifts. The specifications of this ÖNORM do not cover areas where the road traffic regulations are applicable or which concern occupational safety, transport of dangerous goods or fire protection. NOTE- For better emphasis within wide-area guiding systems, other writing systems or coloured background may be used for indications if this supports the orientation of the viewer and does not affect the legibility of the information. Crossed out symbols representing prohibition signs shall not impede the identification of these symbols

## Monthly Notifications Register

Notifications registered at CCMC from 2011-09-01 to 2011-09-30

Sector S : HEALTH, ENVIRONMENT AND MEDICAL EQUIPMENT

Register issued on : 2011-10-07

**Subsector S08: AIR QUALITY**

---

**Subsector :** S08 **Registration Date :** 2011-09-12  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024111/0001 **Project Established**  
**ICS :** 21.260  
**National Ref :** ÖNORM Z 1263  
**Title :** Classification of mist separators for cooling lubricants  
**Scope :** This Austrian Standard applies to planar filter media of mist separators for cooling lubricants. The filter media are classified according to their filtration performance. This Standard is only applicable to water-miscible cooling lubricants (emulsions or solutions) in the concentrations intended for their application, not exceeding 15 vol % of cooling lubricant concentrate in water. This Standard excludes the applicability to non-water-miscible cooling lubricants (cutting oils or bore oils) or to water-miscible cooling lubricants of concentrate over 15 vol % because of possible fire and explosion hazard. This ÖNORM specifies requirements for filter media of mist separators for cooling lubricants. It describes test methods, test bench, the production of test aerosol as well as the methodology for the measurement of filtration performance. The result of the performance measurement according to this ÖNORM cannot be used as direct evidence for the output behaviour during subsequent operation. To achieve results for comparison and classification purposes, the filter media are tested with an atmospheric aerosol. This ÖNORM applies to filter media tested by a volumetric flow within a specified range. Total mist separators for cooling lubricants using these filter media are not dealt with by this ÖNORM. Electrostatic separators, mass force separators, washers and adsorption filters (such as activated charcoal filters) are not covered by this ÖNORM.
