Sector B : BUILDING AND CONSTRUCTION

Register issued on : 2011-11-02

**Subsector B02: STRUCTURES**

---

**Subsector :** B02 **Registration Date :** 2011-10-27  
**Organization :** UNI  
**Country :** Italy  
**Project ID :** 0206D120/0001 **Project Established**  
**ICS :** 93.025  
**National Ref :** E0206D120  
**Title :** Water wells - Design and construction  
**Scope :** This standard defines the general requirements to be fulfilled for what that matters wells designing and building; in particular this standard deals with:
 

- geological and hydro geological background check in the area;
- litho-stratigraphic data analysis;
- aquifer hydraulic parameters evaluation;
- evaluation of the client's water needs;
- designing;
- individuation of the perforation technique compatible with both the target and the environmental problems;
- well dimensional verification and technical compatibility with the scheduled procedures;
- assistance to perforation;
- advance test;
- collecting of stratigraphic, hydraulic and perforation logs;
- well's working designing;
- environmental safety of the operations;
- flow tests and working test of the well
- building site;
- handling of perforation residuals;
- draining waters;
- different perforation techniques;
- mud technology;
- parameters of the different perforation techniques;
- terrain sampling;
- advance test;
- tubular products;
- welding, tightening, centralizers;
- replenishment and insulating products;
- replenishment products laying;
- cementation;
- development techniques;
- turbidity and sand content;
- raising implants for flow tests;
- flow tests execution;
- testing;
- perforation report;
- correspondance certificate to design and standards.

### Subsector B27: WATERPROOFING MATERIALS

---

**Subsector :** B27 **Registration Date :** 2011-10-12  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024179/0001 **Project Established**  
**ICS :** 91.060.20  
**National Ref :** ÖNORM B 3418  
**Title :** Design and construction of snow protection systems on roofs

---

**Scope :** This Austrian Standard regulates the design and construction of snow protection systems for all sloped or curved roofs up to a slope of roof of 60° and with all roofing and waterproofing. The snow protection systems are against the sliding of snow and ice (calculated with ÖNORM B 1991-1-3 and EN 1991-1-3) and are fixed as protection for the roofings and waterproofing. This Austrian Standard refers to the execution of various types of snow protection systems, which have to be adapted to the roof substructure and the roofing and applicable for the different combinations.

\*\* End of Subsector \*\*

**Subsector N14: PLASTICS PIPES**

**Subsector :** N14 Registration Date : 2011-10-12  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024164/0001 Project Established  
**ICS :** 23.040.20, 23.040.45, 91.140.80, 93.030  
**National Ref :** ÖNORM B 5166-3  
**Title :** Plastic piping systems for renovation of underground non-pressure drainage and sewerage networks - Part 3: Complementary provisions concerning the proof of conformity for lining with cured-in-place pipes according to ÖNORMEN EN ISO 11296-1 and -4  
**Scope :** Additionally to ÖNORM EN ISO 11296-1 and -4 this standard includes provisions, which have to be fulfilled according the procedure given in the national foreword of ÖNORM EN ISO 11296-4, to proof conformity of products according § 3 (2) of the Federal Act on Standardization of 1971. This standard is valid for lining with cured-in-place pipes for renovation of underground nonpressure drainage and sewerage networks.

**Relatedness :**

National : New

**Subsector :** N14 Registration Date : 2011-10-12  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024177/0001 Project Established  
**ICS :** 23.040.20, 23.040.45, 93.025  
**National Ref :** ÖNORM B 5168-2  
**Title :** Plastics piping systems for renovation of underground water supply networks - Proof of conformity with standards - Part 2: Supplementary provisions for lining with close-fit pipes according to ÖNORM EN ISO 11298-1 and ÖNORM EN ISO 11298-3  
**Scope :** Additionally to ÖNORM EN ISO 11298-1 and -3 this standard includes provisions, which have to be fulfilled according the procedure given in the national foreword of ÖNORM EN ISO 11298-3, to proof conformity of products according § 3 (2) of the Federal Act on Standardization of 1971. This standard is valid for pipes polyethylen (PE) and fittings of PE to build up lining system for renovation of underground water supply networks. Is applicable for plastic lining systems, which are used for a service temperatur of 20 °C as reference temperature.

**Subsector S01: ACOUSTICS AND SOUND INSULATION**

---

**Subsector :** S01 **Registration Date :** 2011-10-20  
**Organization :** SN  
**Country :** Norway  
**Project ID :** NOT11018/0001 **Project Established**  
**ICS :** 91.120.20  
**National Ref :** prNS 8175  
**Title :** Acoustic conditions in buildings - Sound classification of various types of buildings  
**Scope :** This standard specifies limit values for sound quality classes in the form of: airborne sound insulation; impact sound insulation; sound level (noise level); room acoustic measures (reverberation time, reverberation time related to room height, average acoustic absorption coefficient, STI etc. ).In this standard, limit values are given for dwellings, constructions for public and work buildings and handles in special schools and other buildings used for teaching, day-care facilities for schoolchildren, first-year classrooms, hospitals and care institutions, overnight accommodation, offices, etc. For each type of building or area of use, the limit values are divided into four sound quality classes according to expected use and requirements regarding the building at normally furnished units. All the different criteria for acoustic conditions given for a sound quality class shall be satisfied for a building or parts of a building to be classified in a class. The guidelines for assessing compliance are presented in annex B (informative).To take care of accessibility for all (universal design), criteria are given, in addition to room and building acoustics, to use of sound transmission systems (induction coil, sound amplification systems and similar) or other individual technical aids when needed, cf. Technical Building Regulations. Sound reflecting characteristics of buildings support the visually disabled to orientate. This standard can be used to classify buildings or parts of buildings according to the acoustic conditions in the building, to lay down requirements regarding acoustic conditions for all or parts of buildings that are higher than the minimum requirements pursuant to the Building Technical Regulations. It allows producers to declare the sound quality classification of buildings and provides instructions for compliance with the sound requirements pursuant to the Building Technical Regulations. This standard also represents an opportunity to set standardised
