**Subsector A99: UNDETERMINED**

---

**Subsector :** A99 **Registration Date :** 2011-11-10  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024281/0001 **Project Established**  
**ICS :** 03.100.01, 13.310  
**National Ref :** ÖNORM S 2420  
**Title :** Corporate Security Management - Requirements for concepts for the protection of objects from intentional threats  
**Scope :** This standard is intended to serve as a standard for sustainable building security. As such, this standard also provides assistance in the identification, assessment and management of security risks for objects. Moreover, the standard describes the required procedure for the creation of concepts for the protection of objects from intentional threats. The degree of reaction depends on the structure and size of the standard-applying organization (adequacy analysis). To achieve the pursued objective of protection, use is made of technical, organizational and personnel measures. This standard relates to the protection of objects and includes physical goods (machinery, furniture, etc.). It also includes protecting the physical manifestation (disks, documents) of intangible assets (including the security concepts corresponding to this standard). The protection of data processed by machine, as well as any processes and security checks of persons are not part of the protection goals. This standard does not standardize data protection, fire protection, industrial safety, environmental protection and the handling of dangerous goods.

<b>Title :</b>	Standardization - Part 3. Structure and presentation of standards and other publications - Chapter 4. Guide for addressing environmental issues in product standards		
<b>Scope :</b>	This Guide provides guidance on addressing environmental issues in product standards. It is primarily intended for product standards writers. Its purpose is to outline the relationship between the provisions in product standards and the environmental aspects and impacts of the product, to assist in drafting or revising provisions in product standards in order to reduce potential adverse environmental impacts at different stages of the entire product life-cycle, (NOTE 1 See Annex B for examples) to emphasize that taking into account environmental issues in product standards is a complex process and requires balancing competing priorities, to recommend the use of life-cycle thinking when defining environmental provisions for a product for which a standard is being drafted, and to promote the future development of relevant sector guides for addressing environmental issues in product standards by standards writers, consistent with the principles and approaches of this Guide.

**Project ID :** 00024275/0001 Project Established  
**ICS :** 13.080.10  
**National Ref :** ÖNORM L 1088  
**Title :** Chemical analysis of soils - Determination of "plant-available" phosphorus and potassium by calcium-lactate-hydrochloric acid-method (DL-method)  
**Scope :** This Austrian Standard is used for the determination of "plant-available" phosphorus and potassium in soils with pH  $<$  6 (determination according to ÖNORM L 1083, within CaCl<sub>2</sub> solution). Excepted are soils used for forestal purposes. For soils with pH values  $\geq$  6, the CAL method according to ÖNORM L 1087 shall be applied. The DL method is preferred for soils with pH  $<$  6, because this method partly extracts also apatites which are absorbed by the plant as nutrient from acidic soils. In case of photometric procedures, only orthophosphates are recorded, in the case of plasma emission spectrometry only total phosphates are registered from the extracted solution. In function of the reactive conditions during the photometric procedure, metaphosphates, pyrophosphates or polyphosphates are converted only partly into orthophosphates. When applying this ÖNORM, the general provisions of ÖNORM L 1053 shall be observed.

**Subsector :** S24 Registration Date : 2011-11-10  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024276/0001 Project Established  
**ICS :** 13.080.10  
**National Ref :** ÖNORM L 1097  
**Title :** Chemical analyses of soils - Determination of fixation of potassium  
**Scope :** This Austrian Standard describes a method for the determination of fixation of potassium (potassium fixation) in soils. In practice, this method is applied up to a content of extractable potassium CAL of approximately 140 mg K.per 1000 g of soil, according to ÖNORM L 1087.

**Relatedness :**

### Subsector S26: ENVIRONMENTAL MANAGEMENT

---

**Subsector :** S26 (Secondary Subsector) Registration Date : 2011-11-03  
**Organization :** NEN  
**Country :** Netherlands  
**Project ID :** 50001687/0001 Project Established  
**ICS :**  
**National Ref :** NEN 5619:2011 Concept nl  
**Title :** Radioactivity measurements - Determination of strontium 89 and strontium 90 with liquid scintillation counting  
**Scope :** This standard describes the principles for the determination of the activity of pure beta emitters 90 Sr and 89 Sr. For the sample pretreatment is referred to NEN 5665. The radiochemical determination is made by extraction chromatography and the measurement is done with liquid scintillation counting

**Relatedness :**

### Subsector S27: WASTE - CHARACTERIZATION, TREATMENT AND STREAMS

---

**Subsector :** S27 Registration Date : 2011-11-10  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024288/0001 Project Established  
**ICS :** 03.080.10, 13.020.50, 13.030.50  
**National Ref :** ONR 192102  
**Title :** Durability mark for electric and electronic appliances designed for easy repair (white and brown goods)  
**Scope :** The present ON Rule establishes criteria for a sustainability label for electric and electronic appliances (white and brown goods) designed for easy repair. In a second step, the manufacturing industry and Austrian importers are involved in order to mark appliances meeting the criteria defined. In parallel, marketing is to ensure that such products are increasingly purchased and, hence, their production rises.

**Subsector S99: UNDETERMINED**

---

**Subsector :** S99 **Registration Date :** 2011-11-10  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00024283/0001 **Project Established**  
**ICS :** 11.040.01  
**National Ref :** ONR 112040  
**Title :** Guideline for selection of treatable medical devices  
**Scope :** This ONR provides assistance for purchase of treatable medical devices in health care institutions, in order to optimize the procureme.

**Relatedness :**

**National :** New

---

**Subsector :** S99 **Registration Date :** 2011-11-24  
**Organization :** SIS **Draft Issue Date :** 2011-11-24  
**Country :** Sweden **Latest Date for Comments :** 2012-01-24  
**Project ID :** 00807500/0001 **Draft for public enquiry**  
**ICS :**  
**National Ref :** 807500  
**Title :** Occupational health and safety indicators - Guidelines and examples  
**Scope :** This standard gives guidance on the design and use of occupational health and safety performance evaluation within an organization. This will be done through indicators related to occupactional health and safety. It is applicable to all organizations, regardless of type, size, location and complexity
