**Title :** Tourism services - Classification of accommodation establishments - Category hotel, hotel garni, pension, motel and boatel (accommodation in cabins of the permanent moored passenger ship)

**Scope :** This standard establishes condition for classification of accommodation establishment (category hotel, hotel garni, pension, motel and boatel). The requirements for classification are in conformity with requirements of other European countries. After the first stage of system functioning in the years 2010-2012, it was necessary to assess possible improvements. Based on this assessment, it was decided to make partial modifications in the classification for category of pension

**Project ID :** 00025651/0001 **Project Established**  
**ICS :** 91.140.30  
**National Ref :** ÖNORM H 6031  
**Title :** Ventilation and air conditioning plants - Installation and inspection of fire dampers and smoke control dampers  
**Scope :** This Austrian Standard defines requirements for the installation of fire dampers in buildings. The requirements also apply to the installation of smoke control dampers according to ÖNORM H 6029. The application of fire dampers and smoke control dampers is regulated through conditions made by the authority, relevant Austrian Standards and technical guidelines. This Austrian Standard does not apply to the installation of fire dampers into wood masonry and wood ceilings. Fire resisting doorsets on intumescent basis with or without flexible closing element are not covered by this Austrian Standard.

**National Ref :** ÖNORM B 3358-1  
**Title :** Non-load bearing interior wall systems - Part 1: Terms and definitions, requirements and tests  
**Scope :** This Austrian Standard represents the basis for the material-adequate choice of of non-load bearing single-leaf or multiple-leaf interior walls of variable structure, production and/or application. This ÖNORM does not apply to: - mobile interior walls (e.g. sliding shutter walls, folding walls) - cabinet walls -interior timber walls - interior glass walls. This ÖNORM refers to the product standards for the building materials to be used. Processing directives, function-related requirements as well as possible requirements for building physics are available from the respective specifications and Austrian Standards. Basically, this ÖNORM applies to walls manufactured on site or prefabricated walls. The tests specified in the different product standards are intended to provide evidence of consistent product quality and/or of fulfilment of standard requirements for the respective product.

Register issued on : 2013-04-05

## Subsector I01: SCREW THREADS

---

Subsector : I01 Registration Date : 2013-03-21

Organization : TSE

Country : Turkey

Project ID : tst01025/0001 Project Established

ICS : 21.060.10

National Ref :

Title : Studs Metric

Scope : This standard specifies dimensions and technical delivery conditions of studs with a length of engagement approximately 1,25 d, and studs for sizes M4 to M24 coarse pitch thread and M8 × 1 to M24 × 2 fine pitch thread studs, with a thread length at the stud end of approximately 2d and approximately 2,5 d, of product grade A; and studs which are suitable for mounting workpieces and fixtures in T-slots on machine tool tables.

Studs complying with this standard; having engagement length of approximately 1,25 d, are intended for use mainly in cast iron; having a thread length at the stud end of approximately 2d are intended for use mainly aluminium alloys; having a thread length at the stud end of approximately 2,5d are intended for use mainly in light metals of low strength.

Note 1 - To ensure proper performance of nuts for T-slots (specified in TS 4091) when used together with studs for clamping purposes, the dimensions of nuts and studs used for this purpose must be compatible. T-head bolts should be used since these can take a higher tightening torque, particularly where smaller T-slots are involved.

Note 2 – Thereafter Instead of “studs, metric thread”, the term of “stud” is used.

**Relatedness :**
